Financial benefits

Whether it be extending equipment life due to corrosion inhibition, increasing production output due to enhanced deposit control, or shortening the the start-up time during sulphidation operations, we have resolved to provide you with measureable benefits and reduce your total cost of operations.

Product range

We have acquired a number of different technology suppliers to help you meet your production goals from the CDU through to the final product streams.

Products are available for:

- Crude oil management
- Desalting chemicals
- Emulsion breaking
- Corrosion control
- Antifouling
- Catalyst pre-sulphidation
- Coke minimisation
- Hydrogen sulphide reduction
- Defoaming
- Anti-oxidants
- Scale control
- Cleaning
- Emissions abatement
- Fuel additives
- Product performance enhancers
