

**ADVANCED  
DEGREASING  
DELIVERED**

## Improve tannery performance and leather quality with the latest solutions from Buckman.

Poor degreasing can compromise tanning and dyeing, it can cause staining, white bloom, or spew, and create other problems that make your operation less efficient and your product less desirable. Buckman's got the solution. In fact, we have a full range of advanced degreasing solutions that can give you cleaner hides and skins, higher quality leathers, and greater efficiency throughout the beamhouse and tanyard.

Now, you can manage the fat and gain an edge with advanced degreasing solutions from Buckman.

# Remove the grease. Improve the performance.

Whether you need to boost efficacy, control costs or create a more sustainable operation, Buckman has a degreasing program to meet all of your challenges. With our extensive industry expertise and our advanced line of degreasing products, we can design a program to help you improve degreasing for every type of skin: cow, sheep, goat, pig and more. We can provide in-depth review of your program, analyze for fats and free fatty acids, and customize a program that improves your process and operational efficiency.

Our extensive degreaser product line includes various types of alcohol ethoxylates, lipases and multiple blends of degreasing chemistries, enzyme-plus-surfactant blends and emulsifiers—all solvent and NPE-free.

## Boost efficiency.

Buckman's advanced degreasing chemistries work to:

- Extract and emulsify fat and fatty acids effectively, so they wash out of hides and skins readily and easily
- Disperse and remove lipids, fatty materials and greases while still allowing for fiber lubrication during drying
- Optimize the performance of unhairing chemicals, tanning materials and auxiliaries
- Make hides easier to handle during lime splitting and fleshing
- Enhance fungicide performance

## Prevent quality control problems.

To ensure high quality leather, you must prevent problems before they even start. Buckman can help you prevent:

- Calcium soap stains
- Pink stains on wet blue
- Dark patches in dyed leather
- White bloom or spew
- Fogging of automotive leather

## Protect the environment.

Buckman degreasing solutions feature stable, low-foam formulations that degrade quickly and are free of organic solvents, APEs and NPEs. Our products are formulated specifically to provide a more effective performance while creating a lower environmental impact than traditional degreasing programs.

## Get the support you need.

You can rely on Buckman for technical support and on-site expertise. We will conduct process inspections and perform chemical analyses to diagnose and correct your current problems and prevent future ones. We will continue to monitor the results of our program, ensuring we always meet your expectations and those of your customers.

## Learn more.

To learn more about Buckman and how we can bring more efficient and cost-effective fat and grease control to your leather operation, contact your Buckman representative, or visit [buckman.com](http://buckman.com).
