

BUTANTM 7840LR

Put consistency back in your wet blue.

Gain more control over basification with ButanTM 7840LR.

Successful tanning depends on precise control of pH levels in the process. For that, you need Butan 7840LR, an alkaline basification agent that promotes optimal bonding to carboxyl groups by gradually and predictably raising the pH level in the bath. The result is superior neutralization and chrome fixation, batch after batch. With Butan 7840LR you'll reduce the risks often associated with basification and bring to market more uniform leathers. And that can bring you greater profitability.

pH Profile of ButanTM 7840LR

Don't just get by. Basify with confidence using ButanTM 7840LR.

Buckman precisely controls the quality of our product, so you can control the quality of yours.

Hide after hide, time after time, you can be confident that Butan 7840LR is:

Refined. It is produced only from mineral sources, employing advanced purification technologies. As a result, Butan 7840LR is 97% free of impurities.

Measured. We ensure performance of our rate-controlled basifying agent by monitoring and regulating the particle size distribution of the milled magnesium oxide. Our product is manufactured with consistency—which translates into consistent results for you.

Tested. Butan 7840LR undergoes rigorous testing to ensure that particle distribution is correct and that it provides standardized, controlled reactivity with minimal pH variations.

Certified. A Certificate of Analysis accompanies every batch, stating the chemical composition, particle size distribution and reactivity. So you can have full confidence in its efficacy.

Safety. Uniformity. Reliability.

Look to Butan 7840LR for:

- Controlled and standardized reactivity for repeatable results
- Reduced risk of delayed activity resulting in a reduced risk of green spots in wet blue
- Dependable product availability
- Compatibility with process chemistries including fungicides

All the technical support you need.

In addition to supplying a more standardized product, Buckman can help you with implementation and monitoring to make sure your processes are consistent, too.
