

**BUSAN<sup>®</sup>  
7656**

## There's more than one way to fight mold.

**That's why there's Busan<sup>®</sup> 7656 multi-control fungicide from Buckman.**

When it comes to battling mold, you need every weapon. So Buckman packs a potent blend of fungicides with multiple modes of action into a single fungicide program. Busan 7656 multi-control fungicide gives your tannery the might it needs to fight mold where it wants to grow most—in your wet leathers. And it provides the ongoing protection you need for the long term, preventing damage to your leathers and your profitability every step of the way.

# Twofold mold protection.

## One convenient solution.

A fungal outbreak in your tannery can be expensive. Fortunately, preventing it doesn't have to be. Buckman's unique Busan<sup>®</sup> 7656 multi-control fungicide program utilizes two proven ingredients—TCMTB and OIT—to provide comprehensive, cost-effective protection for all your leathers, including:

- Wetblue
- Wet white
- Vegetable tanned
- Free-of-chrome
- Wet crust

Busan 7656 is long lasting, providing continuous, extended mold control for your leathers in transportation and storage.

## Easy application and handling.

Busan 7656 multi-control fungicide chemistry is tough on mold, but easy on people and product.

- Formulated using a low VOC solvent from a renewable resource
- Low vapor pressure minimizes odor and ensures a nonflammable product
- Safer to transport, store and use
- Stable emulsion ensures long storage life and reliable performance

The biggest benefit of all is the confidence you'll have in your fungicide program. Your Buckman technician can ensure the right dosage for optimal control and then monitor your operation for ongoing peace of mind.

## Learn more.

Don't let mold compromise the quality of your leathers. Safeguard your products and your bottom line with advanced Busan 7656 multi-control fungicide. Contact your Buckman representative or visit [buckman.com](http://buckman.com) for more information.
