

Chrome free. Quality assured. That's the *Buckman Wet White Advantage*.

Are you taking advantage of the rising demand for chrome-free leathers? Now you can, with the *Buckman Wet White Advantage*. Our complete system enables you to make leathers with outstanding fullness, roundness and body that feel the same as, or even better than, conventionally tanned leathers.

The *Buckman Wet White Advantage* is easy to execute and implement for the production of most commonly finished articles from all types of hides and skins. So now you can make great leather and meet the demands of an eco-minded marketplace.

No chrome. No compromises.

The *Buckman Wet White Advantage* makes going chrome-free worry-free.

Eliminating chromium in your tanning process not only makes your tannery's effluent chrome-free, but also keeps hexavalent chromium out of your finished leather. That's important to a growing number of leather markets worldwide, including children's shoes, lining leathers, automotive applications and leather goods. In addition, management of chromium and compliance with regulations is becoming more complex. Going chrome-free can be a simple solution.

Buckman makes it simpler to tap into those growing markets while streamlining your tanning process, without compromising quality. With the *Buckman Wet White Advantage*, you'll get a complete, fully integrated tanning system—including syntans, fatliquors and other special agents—that work together to optimize production efficiency and ensure excellent leather characteristics, batch after batch.

Different kinds of hides. Different kinds of leathers.

Leading tanneries rely on the *Buckman Wet White Advantage* to produce top quality leather articles from a wide variety of raw material substrates, including cow hides, goat skins, sheep skins, calf skins, and buffalo hides.

The outstanding leather characteristics derived from the *Buckman Wet White Advantage* allow tanneries to produce top-quality leather for a range of articles, including leather goods, garments, shoe uppers, upholstery, and more.

Simplified tanning.

With the *Buckman Wet White Advantage*, you can expect:

- Shrinkage temperatures of around 80–85°C—Splitting and shaving of wet white tanned material is not a problem.
- Good lightfastness—Produce bright, brilliant and pastel colors with confidence.
- Easy handling—Wet white is easily sorted, stored and shipped, and can be dried and re-wet with ease.
