

Microbiological expertise
ON A GLOBAL SCALE

BUCKMAN. THE WORLD LEADER IN MICROBICIDE SOLUTIONS FOR LEATHER.

Before bacteria and fungi can advance an attack on your hides and skins, advance the protection with Buckman technologies.

We engage in Leatherforward Thinking to produce the most trusted leather protection programs in the world. Our technologies work to retain all of the quality and value of the hide and provide the best possible foundation for successful tanning, retanning and finishing.

A global leader in R&D, and the leader in exploring the synergy between various biocide molecules for fungal protection and bactericidal efficacy, Buckman is the only company bringing new biocidal molecules into service for the leather industry. Our

Busan® line of microbicides, combined with high-quality technical solutions, preserve and protect better to make your leathers and your business better.

Keep fresh hides fresher.

Turn to Buckman to help you win the fight against the bacteria that causes putrefaction and degrade your fresh hides and skins.

Secure the cure.

Specialized microbicides from Buckman can protect the brine solution, prevent the growth of halophiles and archaea, and help ensure successful brine curing.

Safeguard the soak.

Buckman can safeguard your hides during the critical soaking stage when microbes can cause costly flaws. You can depend on our applications to:

- Prevent damage to the grain
- Prevent nubuck and pin prick effects
- Minimize loose grain break
- Minimize accentuation of vein marks

Prevent mold.

Get advanced protection against a broad spectrum of fungal organisms that can compromise your wet blue, wet white, vegetable tanned, free-of-chrome and wet crust leathers. Proper application ensures that your finished leathers have long-term protection too—in storage, during transportation, and beyond.

THE SUPPORT YOU NEED TO SUCCEED.

With labs in strategic locations across the globe and an international team of specialists in the field, we can help you eliminate the guesswork. We apply the right product and the right dosage at just the right time in the process for superior uptake and distribution. We measure performance and provide ongoing monitoring so you can be sure our microbiological control programs are providing optimum results from beginning to end. Our customized biocidal programs are designed for you. We include training and safety audits, and we can work with both you and your customers to ensure everyone gets what they expect from our products and yours.

Buckman's extensive regulatory expertise and knowledge of local laws and RSL requirements, along with our commitment to product stewardship and safe handling, can help you minimize risk for your business, your people and the environment.

WHEN YOU THINK MICRO, THINK BIG.

When you choose the world leader in microbicides for leather, you stay on the cutting edge of technology—and a step ahead in the marketplace. Future-focused and customer-driven, our Leatherforward Thinking is advancing leather and enhancing production for tanneries everywhere. We can do the same for you. To learn more about our customized microbicide programs and training or other solutions for the tannery, contact your Buckman representative or visit buckman.com.
