

ANTI-STAIN PROTECTION THAT'S A CUT ABOVE

Protect the beauty and value of wood with advanced stain control solutions from Buckman

Discoloration is a leading cause of downgrading in the wood industry. Unfortunately, less than optimal cutting and drying schedules and the day-to-day practical challenges in log and lumber management can make it worse. That's why Buckman offers effective, proven stain-control chemistries that fight microbiological staining. With a complete Buckman stain-prevention program in place, the full value of your wood will be easy to see—at the mill, in the lumberyard, and on your bottom line.

Buckman

PERFORMANCE CHEMICALS

DON'T LET WOOD STAINS SAP THE VALUE OF YOUR WOOD

Win the fight against mold, fungal sapstains, and iron stains with Buckman

You can rely on Buckman chemistries and expertise to protect your hardwood and softwood timber and lumber from the ravages of microbiological growth. Our stain control solutions can help you:

- Preserve surface integrity
- Retain natural color and brightness
- Gain added flexibility in processing, storing and transportation
- Ensure maximum value in the marketplace

Zap your sapstain problems

The challenges

Moisture, temperature, exposure to air, and the passing of time between cutting, sawing and end-use—these factors can promote the growth of fungi and mold that cause sapstaining, the first step toward wood decay. The time and climate challenges associated with global distribution only compound these issues.

The solution

Buckman's full range of microbicides and fungicides, including Busan® 1009 and Busan 888, can give you the advanced sapstain prevention you need to protect maple, aspen, yellow birch, oak, rubber, wood, bamboo and other valuable hardwoods, as well as all common softwoods, including pine, fir and spruce.

Buckman microbiological stain fighters enable you to:

- Add flexibility to your drying schedules
- Protect the value of wood during long-range transport
- Store wood safely to take advantage of market timing
- Easily apply via spray box, dip tanks or pressure chambers
- Successfully protect difficult-to-treat species such as aspen, white pine and red pine

Learn more

Don't let degradation put a stain on your financial performance. Let us show you how Buckman stain control technologies can help you safely and effectively protect the beauty and value of your wood and improve your return on investment.
