

# Buckman Road Dust Solutions

Keep dust down and productivity up.

## Rely on advanced Dust Control Solutions from Buckman.

When you control the dust, you can see success much more clearly. That's why you need to fight dust with more than water. You need chemistry—the right blend of products, equipment, and people.

Buckman delivers with a full range of advanced dust control products and services, tailored to effectively combat your specific dust problems, on the road, in the mine, or in the yard. So you can keep dust where it belongs—out of the air and out of your business.

# Let Buckman settle your dust problems.

## Clearly better

Using water alone to combat your dust problem can be expensive. It requires frequent application because it dries quickly. That's an even bigger problem where water isn't readily available. And even under perfect conditions, the best you can hope for is a 40% reduction in dust, if you water once an hour.

Get full strength Buckman solutions and suppress dust wherever you find it. Our salts, surfactants, soil cements, surface films, and binders help to:

- Increase soil moisture and retention
- Increase the effectiveness of water
- Bind and seal surfaces

You'll spray less often. You'll use less water. People and equipment will be protected. And your business will be more productive.

## On dirt roads

For roads and other soil surfaces, Buckman offers binders and penetrants, soil stabilization, polymer filming, and more.

## At the mine

Let Buckman's Dust Control Solutions help suppress conveyor dust, control floor dust, and lower dust levels in the shaft.

## In the yard

Buckman can offer successful dust control for stockpiles, yards, coal cars, coal storage and dumping, and many other applications.

## The best equipment

To maximize efficiency and efficacy, we carefully select equipment for each application. Spraying, fogging, wetting, foaming, atomizing—the right technique depends on a variety of factors, including environmental concerns.

## Advanced expertise

We do more than recommend and supply chemicals. Look to us for:

- Soil stabilization
- Seepage and leach monitoring
- Continuous dust monitoring
- Toxicity testing
