

WATER TECHNOLOGIES

**A commitment
in Asia that
runs deep.**

Buckman™
Chemistry, connected.

Our Commitment:

To keep every water system cleaner, including the planet's.

For water that flows clean, you need commitment that runs deep. From influent to effluent, cooling towers to process water systems, Buckman can provide the chemistries that prevent fouling and promote efficiency and the technologies that make water work better and your plant work smarter.

Innovative microbiological programs from Buckman include the Oxamine® system, which combines smart chemistry and proprietary feeding and monitoring equipment to bring you a stable water treatment that's tough on microorganisms yet easy on the environment. In fact, Oxamine is a mineral formulation and produces no organic toxins, making it one of the greenest technologies on the market.

Unique programs like our Buckman Green Toolbox can help you save water and energy, reuse wastewater, and operate more sustainably. Assessment and management tools, including our Buckman Process Counselor®, EZe Monitor® and MicroBio Advisor™, give you real time monitoring and control. And our Buckman OnSite® customer portal and dashboard puts comprehensive, real time information and documentation about your entire operation right at your fingertips, wherever you are.

Best of all, you can depend on unmatched expertise from our global network of experienced associates. We work with customers in all industries to help them reduce risk, improve efficiencies, and be good stewards of both the environment and the bottom line. We can do the same for you.

Deep commitment.
Clear benefits.
That's the promise of
Buckman water technologies.

INDUSTRIES SERVED

If it involves water, we can handle it—scale and corrosion control, biofouling, clarification and solids separation, bacterial and fungal control, and more. Industries we serve include:

PULP & PAPER INDUSTRY

Buckman's advanced chemistries and innovative solutions can successfully address water treatment issues throughout your mill, from boilers to cooling towers to utilities.

POWER & UTILITIES

Our highly trained professionals work with you to control costs, improve plant operations and quickly solve problems as they arise.

STEEL

For the steel industry Buckman provides water treatment systems and cleaners to help throughout the steelmaking process, including coke production, iron making, steelmaking, casting, forming and rolling.

OIL & GAS EXTRACTION

For the oil and gas industry, it's not only about extracting natural resources, but also about conserving them; not only about fueling the world but also running your own operation as efficiently as possible. Buckman offers a wide range of the most effective water treatment applications—comprehensive solutions that improve production while reducing energy usage and enhancing safety.

SUGAR & ETHANOL

Buckman offers a wide range of solutions for sugarcane, beet, wheat and corn processors around the world, solutions that can improve products, protect equipment, and enhance mill performance dramatically.

FERTILIZER

Buckman helps the fertilizer producer grow stronger by combining the best chemistries with hands-on service in the field. Let us help improve your fertilizer production, reduce your environmental footprint and increase profitability.

APPLICATIONS AND PRODUCTS

Algaecides | Bioaugmentation | Closed loop cooling systems | Coagulants | Dust control | Color removal
Condensate system treatment | Corrosion inhibitors | Defoamers & effluent defoamers | Effluent metals removal
Enzymes | Filter cleaners | Flocculants | Fuel additives | Hot & chilled water systems | Ion exchange systems
Iron & manganese control | Membrane cleaners | Metals management programs | Microbicides | Microbiological control
Mill water disinfection | Odor control | Phosphonates | Resin regeneration/cleaning | Reverse osmosis treatment
Scale inhibitors | Slime dispersants | Sludge dewatering treatment | Water clarification | Water recycle/reuse expertise
Coal combustion catalyst | Oxamine® | EZe Monitor® | Green Toolbox | MicroBio Advisor™
