

POWER OVER PITCH

Apply Busperse® 2799 for a difference you can measure by the ton.

When Kraft pitch takes over, productivity is sidelined. That's why Buckman created Busperse 2799. It detackifies pitch deposits, so they go out with the sheet instead of sticking to the equipment.

Busperse 2799 can keep your machines running at optimum speed with less downtime for cleaning and significantly less paper waste due to pitch-related defects. Because it's a neutral product, it won't interfere with your wet end chemistry.

Stop culling and start counting the extra tons your operation can produce with Busperse 2799. Power over pitch.

Buckman

PAPER TECHNOLOGIES

DON'T LET PITCH STICK AROUND

Busperse® 2799 from Buckman reduces pitch and waste and increases production.

Profit and pitch don't mix. In fact, pitch restricts stock lines and screens, slowing your production rate. It increases the dirt count in pulp and paper and causes spots, holes and other defects. It reduces brightness and increases the need for bleach and talc. Worst of all, systems have to be shut down for cleaning.

Pitch out. Profit in.

Busperse 2799 is specially formulated for use in both thick and thin stock to coat pitch deposits so they can't stick. It's ideal for a wide variety of mills because it works in pH levels as high as 10.5 after the washers. It won't undermine sizing or your strength and drainage programs.

With Busperse 2799, you can:

- Improve paper machine runnability
- Reduce sheet defects
- Reduce machine system deposits
- Regain brightness
- Add tons to your paper production

In addition, Busperse 2799 is U.S. FDA approved.

Buckman

PAPER TECHNOLOGIES

Case study

A mill making linerboard had serious pitch problems, and the operators had to cull tons of paper because of the dirt. In fact, in late 2011, the mill culled over a thousand tons of paper due to pitch problems.

Buckman applied Busperse 2799. The results were immediate. Pitch deposits were virtually eliminated from the mill. Runnability was improved and production increased. Best of all, the mill culled less than ten tons of paper over the next two years.

Learn more

Whether your pitch problems are seasonal or all year long, Buckman has the expertise and the technology to solve them. So you can run faster, run longer and produce a higher quality sheet. Contact your Buckman representative to find out more, or visit buckman.com.
