

Food & Beverage

In the food and beverage business, clean water is essential. In South Africa, so is the technology that helps you to make the most of it.

**Making the best use of a limited resource?** That takes unlimited commitment. Vision. And innovation. The kind of resources you'll get from Buckman. We can show you how the right investment in advanced chemistries, water quality management tools and green technologies can yield big returns, both financial and environmental. We can help you improve food safety and increase production while reducing water and energy use. So you can feed a hungry and thirsty world while continuing to feed your bottom line.

### **Just add innovation.**

Buckman offers comprehensive, cost-efficient support throughout the plant to help you optimize output, reduce risk, meet compliance, boost profitability and improve sustainability. Look to us for help with:

- Water conservation, recovery and reuse
- Energy savings
- Water quality monitoring and control
- Hygiene and sanitation solutions to help ensure food safety
- Influent, effluent, and recovery treatments, including GRAS polymers
- Corrosion inhibitors for steam and condensate treatment
- Leading-edge enzyme technologies for cleaning and wastewater treatments
- Eco-friendly boiler and cooling water programs
- Products for cold storage and freezers
- Process additives
- Odor and foam control

A blue plastic bottle is being processed by a machine, with water droplets on its surface. The machine is made of stainless steel and has various components like rollers and nozzles. The bottle is positioned vertically and is being held by a metal frame. The background is a blurred industrial setting.

## Tap into a deep well of experience and support.

Since our founding in 1945, Buckman has been committed to the idea that chemistry not only solves problems but also creates new opportunities. That's why we work hands-on and on-site to help our customers continuously improve processes, products and productivity. We are global, serving customers in more than 90 countries, from the Pacific Rim to the Middle East. Yet there isn't a more nimble, adaptive, or accessible specialty chemical solutions company on the planet. Nor is there one more eager and able to help you meet the unique challenges we face here in South Africa.

Why not find out more? To get additional information about our water technologies for food and beverage, contact your Buckman representative or visit [buckman.com](http://buckman.com).

# Buckman

Commitment makes the best chemistry.
