

Clear water. Clear conscience.

Introducing Bulab® 5828—the natural organic coagulant that's clearly better for the earth.

Bulab 5828 is made from a natural, renewable resource. So, unlike traditional metal-based coagulants, Bulab 5828 is completely biodegradable and has no negative impact on the environment. And although it is eco-friendly, it's tough on impurities, bringing clarity to even the most challenging water. With Bulab 5828 coagulant, you'll get the clear water you want with a clear conscience too.

Use highly effective Bulab 5828 in all your water systems—even potable water. You'll see at once why Bulab 5828 is the clear choice in water clarification.

Good for plant and planet.

As your company looks for ways to go green, look to Bulab® 5828 to help your plant meet its water treatment and regulatory needs and protect our fragile ecosystem. You'll find that Bulab 5828 isn't just good for the environment; it's good for the bottom line too!

Environmentally friendly

- No negative impact on the environment— a totally green chemistry
- Biodegradable
- More stable than other tannin-based products
- Safer for operators
- Good for your company's image

Outstanding performance

- Turbidity and color reduction
- BOD and oil and grease removal
- Does not affect water pH like inorganic salts
- Effective on a wide variety of wastewaters

Lower total cost

Because Bulab 5828 is metal-free, so is the sludge, reducing sludge volume and disposal costs. And because Bulab 5828 doesn't change the pH of system water, pH correction and additional alkali costs are eliminated.

The bottom line is, Bulab 5828 can provide exceptional water clarity at a lower total cost than traditional chemistries.
