

Hatch a cleaner, more productive poultry operation.

Apply advanced water treatment and sanitation technologies from Buckman.

In the poultry business, a clean environment is a must. So is a clean environmental record. Buckman can help with both. From pretreatment to waste management, we provide the advanced chemistries and water monitoring technologies poultry processors need for quality, increased productivity, and mitigated risk—economic, social and environmental.

Applying Buckman water technologies can result in a substantial return on investment while helping you meet your sustainability goals. We can offer ways to reduce water usage and energy consumption, stay in regulatory compliance and meet your customers' demands for more sustainable products and practices. With Buckman you can raise your company image while lowering your total cost of operation.

Maximize efficiency and cleanliness throughout your plant.

Whether you need corrosion control in your boiler or sanitation in your broiler house, Buckman is ready with comprehensive water treatment and sanitation support. And we're committed to continuous improvement, always looking for new ways to help your plant reach its full potential.

Get outstanding water management

Buckman can help you reduce downtime and cleaning costs while increasing equipment life.

- Pretreatment—membrane filtration, disinfection, and raw water treatment
- Boiler and cooling water—scale and corrosion control, condensate control, microbiological control
- Total water management—complete water cycle management and monitoring, boiler and cooler audits, effluent treatment and more

Optimize your processes

It's all about being faster, cleaner, smoother and more economical. Buckman can help you improve:

- CIP Cleanings
- Degreasing
- Equipment disinfection and sanitation
- Spin chiller disinfection
- Crate washing
- Floor sanitation
- Odor control

Improve agricultural conditions

Raise the standard for raising chickens.

- Drinking water treatment
- Sanitation for hatcheries, broiler houses and layer houses
- Alkaline foaming agents
- Fogging agents
- Odor control
- Floor and equipment sanitizing

Grow Green

Our Growing Green program features new-generation chemistries and system monitoring solutions, underpinned by the Green Toolbox, a sophisticated modeling program designed to measurably improve your water, carbon and energy footprints and to facilitate both return on investment and return on environment.

Our program includes the following water, waste and energy management tools:

- Water conservation and re-use strategies
- Heat exchanger management
- Buckman Process Counselor
- EZe Monitor™
- Odour control
- Effluent management
- Bio-augmentation

Growing Green can save you money, attract customers, and enhance the quality of life for your employees and your community.

Track your success

Take advantage of Buckman OnSite®, our web-based customer portal and real time dashboard interface that gives you and your service rep access to vital information about your poultry operation—automated and manual controller data, material safety data sheets and more. It offers a new level of visibility into your own processes so you can monitor your success and see more clearly the value Buckman brings to it.

Learn more

Help your plant's potential break out of its shell. Find out how water technologies from Buckman can help you make the most of your resources and equipment and improve your products and productivity. Contact your Buckman representative or visit buckman.com for more information.
