

## BUTAN OIL 7934

## Relax, your leather is safe in our hands

### Produce softer leather with Butan Oil 7934

**Achieving a softer, lighter and fuller leather depends on using the right kind of fatliquoring agent that has high penetration.** For that, you need Butan Oil 7934, a fatliquor with excellent emulsification properties, which penetrates the leather to lubricate the fibril bundles. The result is a superior soft leather with a full and light body after milling. With Butan Oil 7934 you'll reduce the risk often associated with soft fatliquors and experience improved grain fineness, dye levelness and excellent light fastness. And that will benefit your process and your leather quality.

# Don't compromise softness for quality. Fatliquor with confidence using Butan Oil 7934

## Buckman develops products to help enhance your leather's quality and performance.

**Versatility.** Butan Oil 7934 can be used in a variety of product segments due to its synergistic application with other post-tanning products. As a result, it is suitable for a range of upholstery, shoe upper, garment and gloving leathers.

**Handle.** Our soft fatliquor gives improved fullness, compactness and avoids the characteristic greasy feeling that other products may produce.

**Appearance.** Butan Oil 7934 has excellent emulsion properties that enables it to penetrate deeply and evenly into the leather. The resultant leather has an excellent grain fineness, dye levelness and enhanced light fastness.

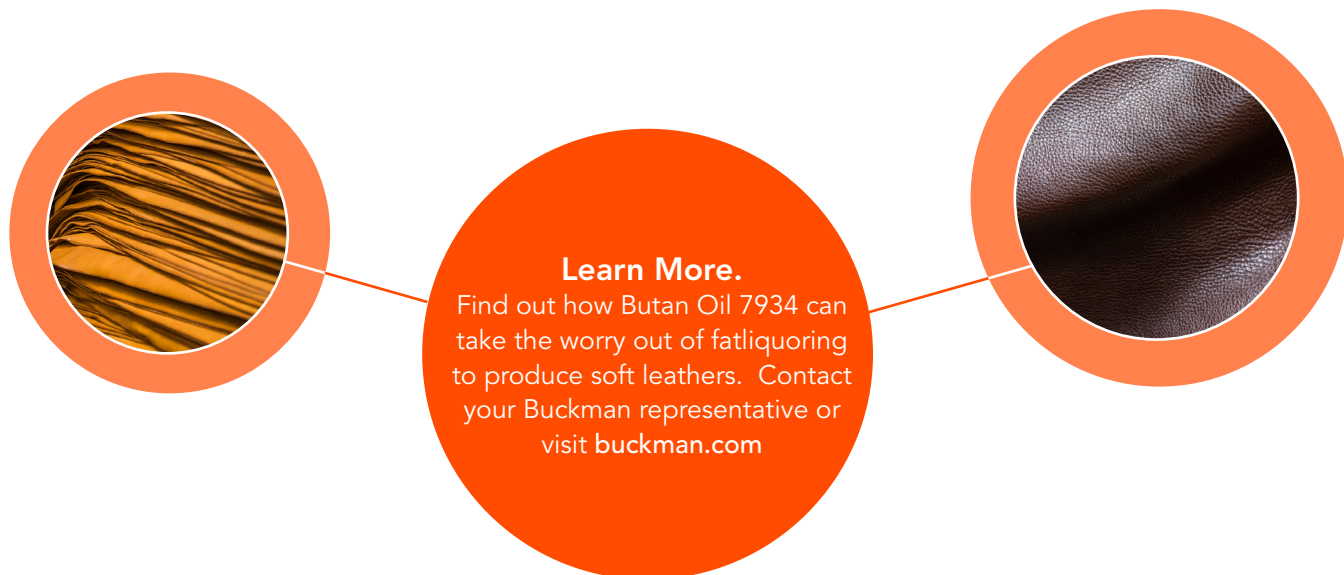

## Control. Fullness. Fineness.

### Look to Butan Oil 7934 for:

- Excellent fatliquor emulsification to increase emulsion stability
- Enhanced penetration and distribution to achieve the required softness
- Fatliquor properties that promote improved fullness and grain fineness
- Improved distribution and evenness to improve color consistency
- Excellent light fastness properties

## All the technical support you need.

In addition to supplying a superior soft fatliquor, Buckman can help you optimize its application in your process.
