

Demulsifiers

Buckman ™
Chemistry, connected.

At Buckman, our mission is to support ethanol producers with the expertise, chemistry, and tools they need to improve yields, decrease operational costs and improve overall throughput.

Demulsifier Products

We provide advanced GRAS formulations with robust capabilities that target specific points of injection, function at optimal process temperatures, reduce the need for residence time while concentrating on efficiently breaking emulsions. Our internally developed oil droplet and absorbency testing methods allow us to understand where improvement opportunities exist, which product is likely to perform best and our many years of experience allow us to share best practices with all of our customers.

In addition, we provide reliable dosing systems, data telemetry and operator training.

Look to Buckman to help:

- Maximize corn oil yield
- Drive profitability
- Improve consistency

This is not an offer for sale. The product shown in this literature may not be available for sale and/or available in all geographies where Buckman is represented. The claims made may not have been approved for use in all countries. Buckman assumes no obligation or liability for the information.
